SUMMARY

Full stack engineer building production web applications end to end since 2023 — from database schema to deployed UI. Founder of Artitek, where I designed and shipped a multi-tenant SaaS platform for condominium administration from scratch to its first paying client.

SKILLS

TypeScript, JavaScript, React, Next.js, Node.js, PostgreSQL, Supabase, tRPC, Prisma, Turborepo, Tailwind CSS, REST APIs, Row Level Security, Git, GitHub, Vercel, CI/CD, Ruby on Rails

EXPERIENCE

Founder & Full Stack Engineer — Artitek · latorreapp.com

2026 – Present

- Founded a custom software consultancy and built La Torre, a multi-tenant SaaS platform for condominium administration, from architecture to first paying client in six months.
- Designed multi-tenant isolation using Row Level Security in PostgreSQL/Supabase, with security controls aligned to OWASP ASVS Level 2.
- Built payment receipt ingestion over WhatsApp and Gmail, using a bounded AI extraction agent that outputs structured attribution objects with no write access to the database.
- Implemented bank reconciliation and dual-currency pricing (USD/Bs at BCV rate), including banking API integrations.

Full Stack Engineer — Kompil · kompil.com

Nov 2025 – Present

- Own features end to end across the stack on a production fintech lending platform: database schema, backend services, and frontend.
- Led a full product redesign, rebuilding the interface while keeping the platform live for existing users.
- Work in a TypeScript monorepo (Turborepo) with Next.js, tRPC, and PostgreSQL.

Full Stack Engineer — GMA Desarrollo

Apr 2024 – Jul 2025

- Full stack engineer on an automotive marketplace, responsible for the entire application: data model, backend, and user-facing product.
- Migrated the platform from Ruby on Rails to Next.js, rebuilding the frontend and API layer.

Full Stack Engineer — Eddu · eddu.app

Aug 2023 – Sep 2024

- Built an educational platform end to end, from database design through the full frontend.
- Delivered the product to production and maintained it through successive feature releases.

EDUCATION

B.Sc. Computer Engineering — Universidad Católica Andrés Bello (UCAB)

2025
